## Bukti Review

Reviewer A:

Dear Editor,

Many thanks for providing this opportunity to review the paper that examines the analysis of factors moderating the effect of performance. This paper is an original research paper that fits the scope of financial ecosystem section of IJBES.

I completed my review on three principles:

1- Originality: This is an original research paper

2- Technical Quality: This paper has a strong logical connection between its sections and methodology. The conceptual review is strong. However, I suggest authors should delist the subtitles under Theoretical and Conceptual Review. The Paper has a strong analysis and methods part. Discussions are sufficiently handled.

3- Contribution to the field: The study analyzed the factors affecting tax aggressiveness within a country-based scope. Findings are well discussed and provides highlights for practitioners.

Weakness:

1- References are not in good shape. IT must fit APA style. Check journal methodology and authors' guidelines.

2- There are too many punctuations mistakes throughout the text. Check them with MS word's grammar check or grammerly!

Some examples: Aggressiveness , the audit committee.....on aggressiveness . tax .....leverage , CR , and inventory

Decision: ACCEPT with minor check

Recommendation: Accept Submission
